

Airoma – Overview

The Airoma system provides flexible programming options which allow costs to be fixed and ensures that fragrance delivery and odour control are matched to location conditions.

Features and Benefits:

Countdown to Next Spray*

Provides visual warning for next spray time, preventing service personnel being sprayed in the face.

Large LCD Screen

Provides easy to read verification of dispenser operation, including visual refill alerts.

Real Time Programme

Allows user to set a start time, hours of operation and days of operation, conserving refill life.

Intensity Plus Event Timer – IPE® Feature*

Allows three pre-set times when the dispenser will spray three times in rapid succession. This feature provide more fragrance to be delivered at busy times.

Unique Lens System

Each dispenser contains a unique lens and lens backing component, which facilitates branding, as well as point of use messaging or advertising.

“Easy” or “Rent” Button

If full programmability is not required the user may select the “Rent” button for quick and easy programming. This feature allows 30, 45, or 60 days settings. No alarm features are activated whilst in use – specifically good for service providers.

Economic Battery Usage

The dispenser uses “C” cell batteries. Battery life is up to 3 years (dependent on conditions) “C” cells are generally a lot cheaper than “D” cells.

Lockable Battery Compartment

Incorporates a lockable battery compartment preventing theft of batteries.

Programme Verification

For programme setting verification the user can press and hold the programme button for 4 seconds to confirm all programmed settings. This is of benefit to installers to verify operation times.

Automatic Reset Switch*

On replacement of a fragrance refill an automatic reset switch recognises when there is no refill present. On refitting the refill the auto reset switches the programme to the existing setting.

Key – Locked Dispenser Cabinet

The same key operates all dispensers in our “Family Affair” range. The lock feature prevents theft of refills.

Refill Empty Alerts

The LCD screen displays the life of a refill.

Choice of Refill Options

Choose from over 14 high quality fragrance refills available with 3000 metered sprays per can.

Test Button

To verify operation of the aerosol with a 5 second countdown alert before spraying.

Cabinet Hinge Operation

The cabinet hinges upwards and not down, which makes the replacement of refills easier, safer and more accurate.
